

Coverings Installation & Design Awards

2020 CID
COVERINGS INSTALLATION & DESIGN
AWARDS

Coverings'20

Congratulations to the 2020 CID Award Winners!

These outstanding tile and stone projects were recognized as part of the annual Coverings Installation & Design (CID) Awards, a program that honors outstanding design and installation of tile and stone in residential, commercial, sustainable and international projects.

An esteemed panel of notable editors and leading designers evaluated submissions based on execution, original usage, and overall design and purpose, and gave special recognition to those projects exemplifying spectacular tile and stone applications.

Thank you to our 2020 CID Awards Sponsors

Hotel Bennett

Commercial Tile Installation

With the use of ceramic, porcelain and glass tile as well as natural stone, marble, limestone and quartz solid surface material, all 100,000 square feet of this installation required dedication, planning and finesse so that the final product would be one that surpassed all expectations.

Hotel Bennett is a 175,000 square foot luxury hotel providing guests with 179 elegant guestrooms and suites. Amenities at Hotel Bennett include a two-tiered upscale restaurant with outdoor dining, a rooftop pool and deck, relaxation spa, fitness center, retail shops, a French patisserie, multiple colorful bar and lounge areas. There is also 12,000 square feet of event space and two picture-perfect terraces located on the 3rd and 9th floors that overlook the most famous green space in Charleston, South Carolina: Marion Square.

Hotel Bennett

The creative design teams and owner envisioned a building that would hold its historic value for many years to come. It once stood as the mid-century Charleston Library and west wing of The Citadel Academy. Since the grand opening in January 2019, Hotel Bennett has taken on new life with a classic European design. One highlight of the project is Cameillia's Champagne Bar; inspired by a Fabergé egg. Plans deviated from a traditional square shaped room to a space designed to appeal to the more feminine side of life, complete with a gorgeous oval marble countertop that was reclaimed and restored from the library cladding. An intricate floor pattern and chandelier lighting compliment the architectural finishes in a most tasteful way.

The impressive interior style is undoubtedly eye catching and guests that visit Hotel Bennett would be impressed to know that our team worked diligently with the design teams to ensure the best quality materials were taken into consideration for the exterior as well. What the eye doesn't see is what is underneath the finished product. Merkrete teamed up with our project team to provide the best three-layered system designed to mimic a three-ply roofing membrane called Merkrete BFP Membrane.
